

Welcome to Kappler University Onsite Workshop

Get ready to experience true Southern hospitality – and world-class training.

Located in the scenic mountain-lakes city of Guntersville, Alabama, Kappler offers a one-of-a-kind training opportunity. Conducted at the company’s corporate campus, Kappler University Workshop is a comprehensive, two-day seminar that blends informative presentations with valuable hands-on exercises.

The workshop is packed with information, including an overview of Kappler fabrics, detailed technical presentations, and critical protective apparel selection and use knowledge. The “Hands-on Hazmat Session” provides a series of challenging but fun exercises and competitions.

The agenda features a campus tour including our R&D and manufacturing facilities. Each day is capped off with casual lakeside dining at different locations on beautiful Lake Guntersville. Kappler provides delicious lunches and dinners plus hotel accommodations – you just cover travel expenses to and from our facility.

Our workshop is geared toward providing attendees with detailed knowledge of protective apparel and related topics. You’ll leave with a greater understanding of Kappler, an abundance of knowledge on chemical and biohazard protection, and an inside view of our mission to “keep bad stuff off people.”
